AK-HC3900GSJ	4010869302951	**Panasonic AK-HC3900GSJ Multi-Format Studio Camera** The AK-HC3900GJ/HC3900GSJ studio camera is designed for broadcasting, event and is equipped with a large sensor for high sensitivity and video quality. By combining with AK-HCU250PJ/PSJ/ HCU250EJ/ESJ Camera Control Unit (CCU) and the AK-HRP250GJ Remote Operation Panel (ROP), it is possible to construct a long-distance optical Fiber transmission studio camera system at low cost. The cost-effective AK-HC3900 1080p HDR studio camera system, which will be upgradable to native 4K 60p/50p is ideal for broadcast, education and corporate markets. Equipped with a large sensor for high-quality video production The AK-HC3900GJ/GSJ captures its raw image from an internal 4K imaging system to deliver its stunning HD HDR images with ITU-R BT.2020 wide colour space. The Internal 4K capture also means that the future optional 4K system upgrade to 4K 60p/50p production with native 4K video and 2000TV horizontal resolution. The AK-HC3900 camera system includes a full simultaneous HDR/SDR feature set, expanded multi-format capability (1080: 59.94p, 50p, 59.94i, 50i, 29.97PsF, 25PsF, 23.98PsF; 720: 59.94p/50p) and a future upgrade option. The AK-HC3900 achieves a high sensitivity of F10 at 59.94Hz (2,000 lx) and a S/N ratio of 62 dB. The camera offers a built-in motorised ND filter. The new cost effective AK-HCU250 camera control unit (CCU), in combination with the new AK-HRP250 remote operation panel (ROP), will connect the high-grade uncompressed video and control to the camera head via optical fibre or utilise SMPTE Hybrid cable to provide camera power as well. The new CCU includes all the system features of the HC3800 along with simultaneous output of HDR/SDR, and the HC3900's expanded multi-format capability and 4K upgrade path. New features include 3G trunk and 3G prompter functions. AK-PLV100GSJ	4010869312943	**Panasonic AK-PLV100GSJ - 4K CINELIVE Studio camera with 5.7K Super 35mm sensor and PL Lens mount** With a Super 35mm 5.7K MOS sensor and PL mount, inherited from the VariCam camera, Panasonic is bringing its pioneering experience of cine live technology to its studio camera line-up - enabling powerfully expressive video with a shallow depth of field to bring it closer to the director's intention. To support production studios moving towards more connected, IP-based workflows, the camera features SMPTE ST 2110 compatibility. This enables more streamlined connection to the KAIROS IT/IP platform (released in May 2020), which gives professionals unlimited control to deliver rich content to multiple screens and streams. SMPTE ST 2110 input/output will be possible directly from the AK-PLV100GJ camera head without connecting to a CCU*, enabling IP-based live production with just the camera, doing away with the need for complicated systems. It's also possible to output 12G-SDI signals directly from the camera head, allowing for flexible system construction and wide-ranging operations. The camera head is fully compatible with the accessories for Panasonic's 2/3-inch studio-camera line-up. By simply replacing the existing camera head with the AK-PLV100GJ, cinematic video can be created with the existing CCU (AK-UCU600 or AK-HCU250). **Future upgrade* **3 Years European Warranty - 5 Business Day Target Turnaround Time**	€ 33.500

MOVICOM PT HEADS

ITEM NUMBER	EAN / UPC-CODE	Movicom	Recommended List Price
		RobyHead D1 is a classic Pan/Tilt solution for professional broadcasting, as well as for stationary use in studios, theatres, conference halls and stadiums. The head is specially designed to work with 4K cameras providing 4x3G SDI, 12G SDI and 2xFiber connections for the camera signals. The most typical payload for the head would be a box-size camera, but it has enough power to carry studio cameras and has connections for a prompter at the front. The head has a rigid and stylish carbon-fibre body and provides smooth and precise movements. An integrated power supply simplifies camera connections. RobyHead D1 may be controlled via IP or serial interface, so it can be easily integrated into studio infrastructure or outside broadcast venue and used in remote production.
